

PLANT AUTOMATION GROUP, LTD

Welcome friends and future clients,

Thank you for visiting our web site. Our hope is to provide your team an equipment partnership, allowing you to achieve an automation advantage custom developed for your Individual application. We believe in long term relationships and strategic planning for future success.

As you will learn, our team is highly skilled in all segments of processing and packaging equipment. Each project we support is custom tailored to your unique requirements. My goal is to provide your company with the best people, products, and services. With the goal of being your exclusive future equipment partners for any automation requirements.

All of us at Plant Automation Group are serious about providing cost effective solutions for your company. We all have the necessary experience to suggest the right machine based on your volume requirements. Whether your application is for Processing, Filling, Capping, Labeling, flexible packaging, or end of line automation our team will deliver.

Going forward, we are excited to support your challenges, you will find us quick to respond. Your application will take priority. We can offer this level of service due to the experience of providing tens of thousands of machines previously.

Thank you, all the best with your projects –

Dan P. Coakley
